

Whitley County Health Dept Community Environmental Rating Report

Today's Date 10-11-18 Report for Blue River Estates (55 residences)

#of non-compliant systems - determined as % 0 % non compliant

of citations = determined as a % 0% written complaints

Information received from community There has been six septic repairs since the addition was created. Three possible septic systems with faint signs of failure, but do not meet state definition.

Physical site assessment Cannot say any septic systems failing. This is an older subdivision with septic systems in very poorly draining soils. I expect future failures of septic systems will continue.

Prior testing data No water or dye testing.

Written Summary: The biggest concern with this addition is the age of the septic systems.

42% of the septic systems are 30 years or older, than is 23 of the 55. I do not have off site drainage of septic systems that I have found.

Overall Assessed Score (1-5): 3
