

## Whitley County Health Dept Community Environmental Rating Report

Today's Date 10-11-18 Report for Dunfee (14 locations)

# of non-compliant systems - determined as % 93%, only the commercial structure has a permit

# of citations = determined as a % 36%, five complaints over the years

Information received from community Most owners know they discharge off site to the south and to the west. Owners have filed complaints with the Co. Hwy, when the tile backs up.

Physical site assessment Witnessed the county tile behind the old butcher shop being opened and sewage flooded out. Sewage also found in tiles in donetello's village upon creation of the subdivision.

Prior testing data No water or dye testing occurred. Sewage was evident and homeowners confirmed.

Written Summary: Dunfee has been investigated by previous health department inspectors for decades. We had an agreement with Aqua Indiana 10 years ago to bring sewer across the tracks and they reniged. Without a doubt almost all locations discharge illegally to the waters of Indiana.

Overall Assessed Score (1-5): 1
